

Scheduling Recording in Security Eyes Pro Systems:

Follow these steps to Schedule Recording in the Security Eyes Software.

A. Open the Scheduler

1. Click on the “Schedule” Button – This will open the Scheduler

B. Creating a New Schedule

1. Notice that the Black window at the bottom of the scheduler window is empty.

2. First, select the Times for the schedule to be active.
 - If you want the schedule to be active for 24 hours in a day, then set the time as follows:
 - i. Start Time: 12:00:00 AM
 - ii. Stop Time: 11:59:59 PM

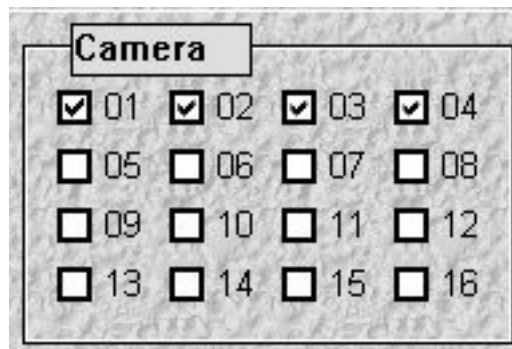

3. Then Select the "Start Setting" -
 - This area allows you to select what will occur when this schedule is active.

4. Select "Record" and "Motion Detect" if you want the cameras to record only when motion is detected, or just "Record" if you want them to record constantly

5. Select the Cameras that you want to be active when this schedule is active

6. Select the Days of the week this Schedule will be active

7. Select the Net Schedule Settings

8. Press "Add New Data" button to create the new schedule

Once you have added the new data, your schedule will appear in the black screen below.

Once the Schedule is active, close the Scheduler window.

Click on the "Record" button then select All Record

Once the Schedule is active, a **Record** icon will appear at the bottom of each camera.
Click on the Program Settings Button and Select **Start Monitor**

When the Camera is Recording, the icon will change to **Recording** from **Record**

Schedule Recording Completed
